

IMPORTANT SAFETY PRECAUTIONS

- A short Power Cord is provided to reduce risks resulting from becoming entangled in or tripping over a longer cord. **Risk of injury and electric shock.**
- Do not place the appliance over or close to sources of heat such as electric rings, hot ovens or open flames. **Risk of electric shock and fire.**
- The appliance shall not be placed in a cabinet or appliance garage when in use. **Risk of fire.**
- NOTE: Any plug cut from the power supply cord should be disposed of immediately, inserting any cut off plug into a 13A socket-outlet is hazardous. **Risk of electric shock and fire.**
- Do not immerse in water or any other liquid. **Risk of electric shock and fire.**
- Avoid spilling any liquid on the connector. **Risk of electric shock**
- Only use the appliance with the Power Base supplied. **Risk of electric shock and fire.**
- Allow the Milk Frother to cool down completely before cleaning and storing. **Risk of burns or scalding.**
- Do not fill above the 'Max' mark. **Risk of electric shock and burns.**
- Do not use in bathroom or outdoors. **Risk of electric shock.**
- Remove the appliance from its Power Base before filling or pouring. **Risk of electric shock.**
- Take care when pouring – pour slowly and do not over-tit the Milk Frother. **Risk of burns or scalding.**
- Milk will remain hot for a considerable amount of time after heating and can present a scald hazard. Keep the Jug, Power Base and the mains lead away from the edge of worktops and out of reach of children.
- Heating element surface is subject to residual heat after use. **Risk of scalding.**
- Do not misuse the appliance; it is designed for use with milk and food items only. **Risk of injury.**
- Do not allow cable to touch hot surfaces, or to hang over edge of a table or counter top. **Risk of fire or electric shock.**

BEFORE FIRST USE

- Read this instruction manual before you start using the appliance. It gives you important safety information and will ensure you get the most out of your Dualit product.
- Unpack the box with care, keeping all the packaging materials until you are satisfied everything is present and in working order. Once satisfied recycle the packaging appropriately.
- Keep this manual and your proof of purchase in a safe place.
- Don't forget to register your product at www.dualit.com/register

SAVE THESE INSTRUCTIONS

In the interest of improving products, Dualit Ltd. reserves the right to change the product specification without prior notice. All illustrations are for representation only, your model may vary from illustrations shown.

INSTRUCTIONS ON ENVIRONMENT PROTECTION

Do not dispose of this product in the usual household waste at the end of its life cycle. Please hand it over to a collection point for the recycling of electrical and electronic appliances. The symbol on the product, the instruction of use or the packaging will inform you about the methods of disposal. The materials are recyclable as mentioned on its marking. By recycling, material recycling or other forms of re-utilization of old appliances you are making an important contribution to protect our environment. Please enquire with the Local Authority for the authorised disposal location.

READ ALL INSTRUCTIONS BEFORE USING THE APPLIANCE. KEEP THESE INSTRUCTIONS FOR FUTURE REFERENCE.

IMPORTANT SAFEGUARDS

- **THIS IS AN ATTENDED APPLIANCE. Do not leave unattended during use, unplugging after each use (risk of fire if an unattended appliance is left operating).**

- This appliance must not be used by children younger than 8 years old or persons with very extensive and complex disabilities. Children aged 8-14 years and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge shall not use this appliance, unless they are supervised and have been given instruction concerning the use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance and user maintenance shall not be made by children unless they are older than 8 and supervised. Keep the appliance and its cord out of reach of children less than 8 years old. **Risk of fire, electric shock, scalding or injury to persons.**
- This appliance is intended for indoor household use only. If the appliance is used improperly or for professional or semi-professional purposes or if it is not used according to these instructions the guarantee becomes invalid and Dualit refuses any liability for damage caused.
- Ensure that the voltage of the appliance corresponds to that of the mains supply. **Risk of electric shock and fire.**
- **WARNING:** This appliance must be earthed. **Risk of electric shock and fire.**

Electrical Safety

- In order to avoid a hazard, if the Power Cord is damaged it must, for safety reasons, be replaced by Dualit or a qualified electrician. Call Dualit's Customer Helpline on +44 (0) 1293 652 500. **Risk of electric shock and fire.**
- Do not operate any appliance with a damaged Power Cord or Plug, or after the appliance malfunctions or has been dropped, damaged or cracked in any manner. **Risk of fire, electric shock and fire.**
- This appliance conforms to directive 2014/30/EU regarding electromagnetic compatibility.
- Never touch the Power Cord with wet hands. **Risk of electric shock.**
- Never use the plug without the fuse cover fitted. Ensure replacement fuses is the same current value as the original. Replacement fuses are available and should be ASTA approved to BS1362. **Risk of electric shock and fire.**
- We recommend that the appliance is plugged into a socket that has no other appliance connected to it. Failure to do this may cause an overload, trip a circuit breaker or blow a fuse. Preferably the socket outlet should be protected by a residual current device (RCD).
- The use of extension cables is not authorised by the manufacturer and may cause damage or accidents. **Risk of electric shock.**

General Safety

- The use of accessory attachments not recommended by Dualit may result in fire, electric shock or injury to persons.
- Do not touch the metal body when the appliance is in use. **Risk of burns or scalding.**
- Do not place the appliance on a polished wood, marble or porous surface. **Risk of property damage.**
- Do not operate on an uneven surface. **Risk of injury.**
- Do not use a scouring pad or abrasive cleaner on the appliance body. **Risk of damage.**
- **CAUTION:** To prevent damage to the appliance do not use alkaline cleaning agents when cleaning, use a soft cloth and a mild detergent.
- Unplug the appliance from the mains to allow to cool before cleaning, maintaining or moving. **Caution:** Hot liquid. For details, please refer to cleaning section. **Risk of fire, electric shock, scalding or injury to persons.**
- The Power Cord should not be allowed to come into contact with hot surfaces. **Risk of electric shock.**

Cocoatiser Hot Chocolate Maker

Instruction Manual

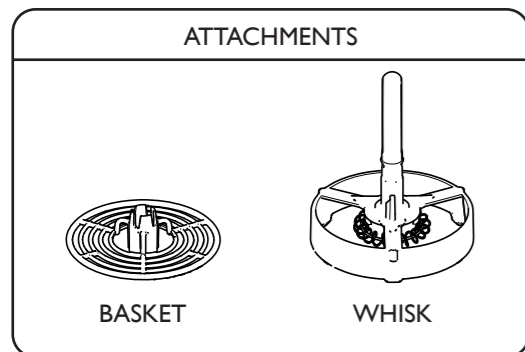

TO REPLACE FUSE: REMOVE SILVER LABEL TO ACCESS SCREW OR REMOVE COVER.

TROUBLESHOOTING

APPLIANCE DOES NOT TURN ON	
1. Appliance is not plugged in.	
2. The plug fuse may have failed.	
3. Heating element is broken or thermal fuse has been activated.	
4. Jug is still warm from previous cycle.	
NON-STICK COATING IS DAMAGED	
1. The milk has overheated after the cycle.	
1.1. Ensure that the milk level is within the minimum and maximum fill markings to avoid overheating and damaging the non-stick coating.	
1.2. Do not lift the Jug before the cycle is completed to avoid overheating and damaging the non-stick surface.	
2. Do not use abrasive cloths or insert sharp objects when cleaning the inside of the Jug.	
LARGE AMOUNT OF CHOCOLATE RESIDUE LEFT INSIDE JUG AFTER CYCLE	
1. Chocolate should be added after the Whisk with Basket attachment and milk have been placed into the Jug.	
1.2. We recommend using cold milk straight from the fridge, to improve melting efficiency for chocolate beverages.	
1.3. Use less chocolate or break into smaller pieces. Using chocolate with lower cocoa content will reduce/eliminate chocolate residue.	
1.4. Do not turn the device off when cycle is in progress. This will reduce chocolate melting time and increase the chance of residue build-up.	
1.5. Leave the device for 1 minute after a completed cycle to allow longer melting time. Move the Whisk up and down to encourage melting.	
1.6. Ensure the device is allowed to cool fully between cycles.	
WHISK IS NOT SPINNING OR IS NOISY WHEN SPINNING	
1. Whisk has misaligned from motor.	
1.1. Remove the Whisk from the Jug and re-insert. This should allow the Whisk to rotate normally and to eliminate noise.	
1.2. Ensure that the Jug, Whisk and Basket are clean before using as any residue can disrupt the magnetisation and centralisation of the Whisk.	
2. Remove the Whisk and Basket from the Jug and reinsert. Always use the Basket attachment when making chocolate beverages.	
3. When using the Basket, slide onto the Whisk and push down until it clicks into place.	
4. Milk/chocolate has dried onto the Whisk or Basket.	
4.1. Check the Whisk and Basket spin freely before using your device (remove the Whisk and use your finger to spin). Any residue may affect functionality. Ensure that the Jug, Whisk and Basket are clean before using and before storing.	
THE POWER BUTTON IS FLASHING BUT THE DEVICE WILL NOT TURN	
1. The boil-dry feature has been activated.	
1.1. This feature protects the device if it gets too hot. Wash the Jug with cold water and make sure to fill above the MIN line when adding milk.	

KNOW YOUR APPLIANCE

SETTING UP YOUR APPLIANCE

Register your appliance on www.dualit.com. This will only take 60 seconds. You will need the product model and serial numbers that are on the rating label on the base of the product.

Remove all packaging, tape and protective paper. **BEFORE FIRST USE:** Clean the Lid, Attachments and inside of Jug with warm, soapy water, rinse well then dry. Do not immerse. **Risk of electric shock, fire and product damage.**

The surface must be flat in order to keep the appliance level and stable. **Risk of injury.** Position in a safe space away from:
 • Heat sources. **Risk of electric shock and fire.**
 • Water taps. **Risk of electric shock.**
 Do not position:
 • In a cupboard. **Risk of fire.**
 • Close to curtains or flammable material. **Risk of fire.**
 • On a tray that collects liquid. **Risk of electric shock.**
 • On a polished wood, marble or porous surface. **Risk of property damage.**

USING AND CLEANING YOUR APPLIANCE

FAILURE TO CLEAN YOUR APPLIANCE AS PER INSTRUCTIONS WILL INVALIDATE YOUR GUARANTEE AND CAUSE DAMAGE TO YOUR PRODUCT.

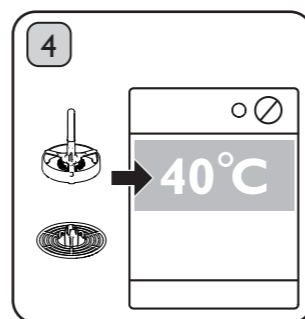

Select your drink from the Quick Reference Guide. Assemble the Whisk, with the Basket and place in the Jug. Fill Jug to the specified volume stated in the Guide, with cold milk straight from the fridge. Add chocolate and/or any other ingredients if using and press the Power Button. When the cycle has finished, the Power Button light will go out. Pour and enjoy.

We recommend cleaning immediately after each use. Unplug, remove Jug from Power Base and remove the Whisk and Basket. Clean inside of Jug, Whisk and Basket with warm, soapy water and a non-abrasive cloth. Alternatively, after use fill Jug with warm, soapy water and leave to soak before rinsing. Never immerse the Jug or Power Base in water. **Risk of electric shock, fire and product damage.**

NOTE: If you are using the appliance for multiple cycles consecutively, you will need to allow time for the Jug to cool. After 2 cycles fill the Jug with cold water and stand for 1 minute before discarding. Repeat after each additional cycle.

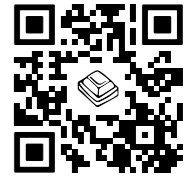

The Whisk and Basket only may be placed in the dishwasher. Use a wash cycle below 40°C and place on the top shelf. The Jug and Power Base cannot be cleaned in the dishwasher. If you have finished using the appliance, dry thoroughly before storing with the Lid in place.

QUICK REFERENCE GUIDE

The Cocoatiser will make the most gloriously rich, creamy hot chocolate with a variety of chocolate options. Get creative with chunks of your favourite brand of chocolate bar*, flakes, buttons or traditional hot chocolate powder.

It is important to follow the instructions, remember to always use the Whisk with Basket when making chocolate drinks and fill to the correct Fill Markings on the Jug to achieve perfect results.

DRINK	APPLIANCE INGREDIENTS	METHOD
HOT CHOCOLATE	Max fill 225ml cold milk + 25g-35g chocolate*	 SHOP HOT CHOCOLATE
MOCHA WITH INSTANT COFFEE	Max fill 225ml cold milk + 25g-35g chocolate* + 1 x serving instant coffee	
MOCHA WITH ESPRESSO	Max fill 225ml cold milk + 25g-35g chocolate* + 1 x shot espresso	
CHOCOLATE MILKSHAKE	Max fill 225ml cold milk + 25g-35g chocolate*	
<p>* The appliance is designed to be used with a wide range of chocolate. For best results, we recommend using chocolate flakes, though you can use chocolate segments no larger than 1cm² and 0.5cm thick, powder or buttons no smaller than 1cm diameter and 0.5cm thick. Use pure chocolate only, with no added ingredients such as nuts, raisins, biscuit, coconut, caramel, wafer, nougat etc. as they may block the whisk. You may need to chop the chocolate to the recommended sizes. Note: deviating from the recommended ingredients can affect the volume of beverage produced and performance of your appliance. Never fill above 225ml or below 'MIN' fill volumes.</p>		

HINTS AND TIPS

GENERAL

- Always use cold milk straight from the fridge.
- The appliance works best with milk that has a high protein level e.g. dairy or soya.
- Dualit recommends using semi-skimmed or UHT milk. Full fat milk will not froth well as the fat content is greater than 3%. Remember, different milks froth at different rates.
- When using plant-based milk such as soya, oat, almond etc., make sure to use 'barista-grade' as these varieties will produce more froth.
- You can use water instead of milk, or a mix of both water and milk, for a lighter option. Note that adding water will reduce the amount of froth produced. To make a hot chocolate with water and milk, we recommend adding 125ml of milk to the Jug first, then topping up with water to the 225ml fill line.

CHOCOLATE

- Breaking the chocolate into smaller pieces will ensure it melts more efficiently and reduces residue.
- If you find chocolate residue in the Jug after serving, on next use wait 1 minute after the cycle has finished, before pouring.
- Choosing a chocolate with a lower cocoa content will reduce the amount of residue as it has a lower melting point.
- If you find chocolate residue on the Basket after frothing, move the Whisk up and down while submerged in the hot milk, until it has melted.
- Check that the Whisk and Basket spin freely before using your device. Any residue may affect functionality. Ensure the Jug and all Attachments are clean before use and before storing.
- If you prefer a sweeter chocolate drink, add up to 50g of chocolate. Note this may increase the amount of residue.
- You can make two Chocolate Milkshakes at the same time; divide the volume of liquid between two cups and add 70g of ice per cup.
